Test: Make Your Own Sound Map!

Can you create a Sound Map of the woods using household items? Follow these steps!

Materials You Need:

- Pots, pans, spoons, bottles, paper, plastic bags, or anything that can make a sound like nature.
- Paper and crayons/markers.
- A quiet place to listen and make sounds.

Steps:

1. Listen to the Nature Sounds:

Listen to nature sounds on a recording (like birds chirping, water flowing, or leaves rustling). Can you hear these sounds?

2. Gather Materials:

Find some household items to make those sounds! For example:

- Crumple paper to sound like leaves.
- Tap spoons on a pot to sound like a woodpecker.
- Use a bottle of water to sound like a brook.

3. Make the Sounds:

Try using your items to recreate nature sounds. Have fun and be creative!

4. Draw Your Sound Map:

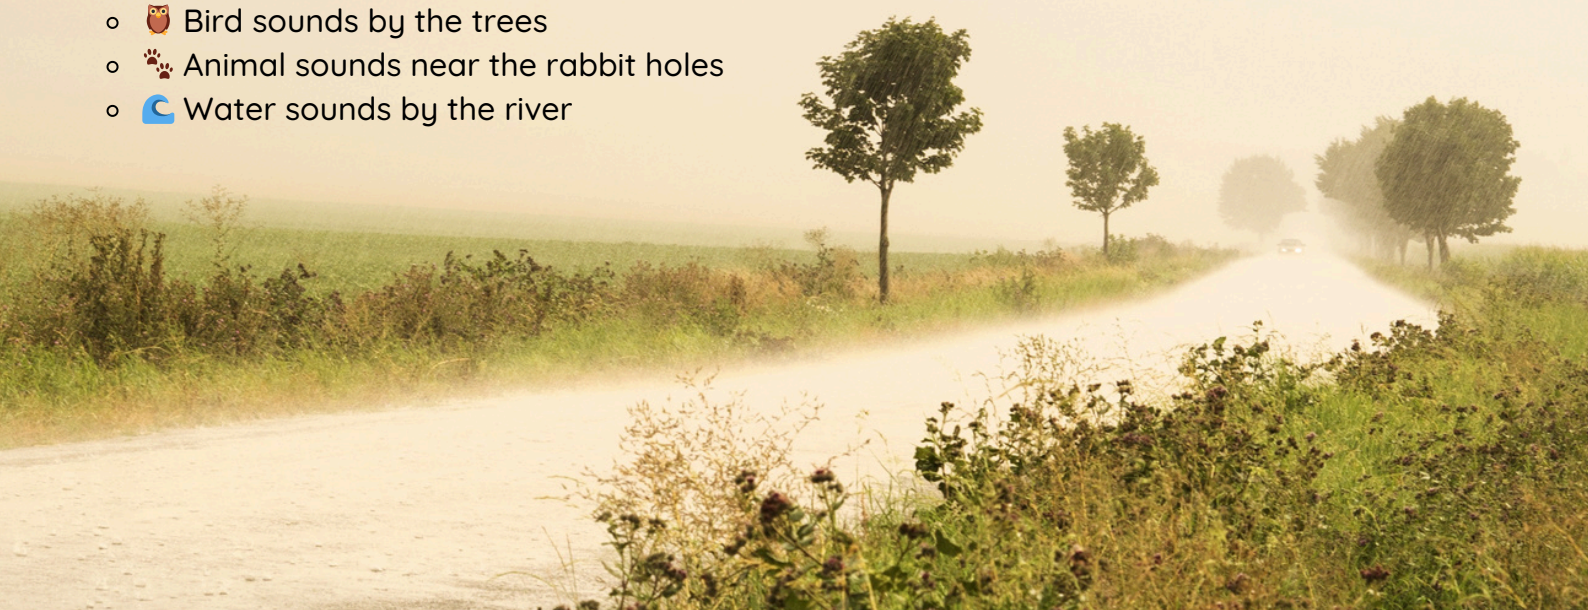

Draw a simple map of the woods. Mark different areas where the sounds might come from (like a river, trees, or animal habitats).

5. Map the Sounds:

Choose which sound goes with which place on your map. Draw or write the sounds in the right spots.

For example:

- 🦉 Bird sounds by the trees
- 🐾 Animal sounds near the rabbit holes
- 🌊 Water sounds by the river

MY SOUND MAP

Draw your Sound Map here!

Test: Make Your Own Sound Map!

Now that you've drawn your Sound Map, it's time to create a Sound Story!

Create a Sound Story:

Use your map to tell a story about a walk through the woods. Move from place to place, and use your items to make the sounds as you tell your story!

Share Your Sound Story:

Perform your story for your family or friends. Tell them about your map and the sounds you made!

Fun Learning:

By doing this activity, you'll practice listening carefully, using your creativity, and learning about mapping and storytelling!
